

Sense Surface Connect

Sense Surface Connect is an elegant, slim, surface-mounted ceiling luminaire featuring an integrated SG Connect sensor for smart, energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, delivering significant energy savings. A built-in daylight sensor can be activated to maintain the desired light level at all times. Configuration is simple via the SG Connect Commissioning App, and the luminaire can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Sense Surface Connect is engineered for tool-free installation, with a quick connector between bracket and front held firmly in place by strong magnets. An innovative mechanism lets you choose a flush front for concealed cable routing or a slightly floating front for surface-mounted cabling.
