

DALI dimmer, which can control both the intensity and colour (via DALI Type 8). In order to change the colour temperature, simply double click on the rotary switch. The 4 buttons allow you to save the applicable setting, which can be recreated at the click of a button. It features an integrated DALI power supply that ensures simple installation without the need for any other DALI equipment. One LEDDim DALI can control up to 64 DALI luminaires via broadcast. It is possible to connect up to 4 LEDDim DALI units together and control up to 256 DALI fixtures.
