

# Lineal Surface Connect

Version of Lineal Surface which comes complete with driver and integrated wireless SG Connect sensor. The sensor is discreetly positioned at the edge, switches on when it detects movement and switches off after a pre-selected period of time to save energy. The sensor also includes an integrated daylight sensor. If this function is activated, the sensor will constantly work to provide the desired amount of light in its work area. The lighting control is easy to configure using the SG Connect Commissioning App, and the luminaire can be used individually or as part of a larger system, which can easily be enlarged or reconfigured as needed.
