

Zip Jelsa

Zip Jelsa is an exciting design concept that combines functionality and aesthetics in the Zip track system. The series features both efficient spotlights and decorative pendants, perfect for creating atmospheric lighting in any space. The recessed light source provides soft and pleasant illumination, ideal for both functional and ambient purposes. By rotating the front, you can open a light slit that adds a decorative touch. Zip Jelsa comes with a black front ring as standard, while an elegant gold ring is available as an accessory to further enhance the design.
