

NeoStrip RGB

NeoStrip is an RGB LED strip, which enables creative lighting solutions both indoors and outdoors. All the colours of the rainbow can be created by mixing red, green and blue (RGB) in different ways. NeoStrip is encased in silicone and has waterproof IP65 protection. No profile or diffuser is required. NeoStrip has a top-bending radius of 300mm, and comes with clips for fixing to the surface, making it very easy and flexible to install. It can be cut at intervals of 6.3 cm to be tailored to each individual installation. When cutting, an end cap can be mounted to achieve waterproof IP54 protection. NeoStrip requires a driver and a controller. To control the light, use a remote control and/or pulse switch.
