

Junistar Soft TW is equipped with the revolutionary Tunable White (TW) LEDDim technology. You can regulate both the lighting level and colour without extra cabling, using SG's TW LEDDim Smart dimmer. Control it manually or via the LEDDim app. When using the SG Smart Gateway, you can also set a daylight sequence which changes colour and intensity throughout the day. You can choose a standard rhythm or set your own. Junistar Soft TW comes in two colour temperature ranges: 2700-6500K for traditional TW with the typical circadian spectrum, or 2000-4000K for typical residential use including warm and cosy colour temperatures. This is similar to DimToWarm, but with independent control of light level and colour temperature.
