

Junistar Sun IsoSafe is a downlight, featuring a new LED technology that closely resembles the sun's light spectrum. This means it has less blue light content and excellent colour rendering, even in the red end of the spectrum. So, if you need light as natural as possible, Junistar Sun IsoSafe is the right choice. Junistar Sun IsoSafe has a patented, adjustable 30-degree tilt function in all directions and comes with a junction box with ample space for connection and automatic strain relief for many types of cables and plastic tubing.
