

The Shopline DALI is a stylish track system with rails and accessories in white and black. It has a narrow design and attractive matt finish, which means that it matches the ceiling perfectly. Perfect for shops, offices and exhibitions. With 3-phases, large installations are possible while splitting the phases on separate circuit breakers. And with the DALI control each luminaire can be individually addressed and controlled. Track can be cut to any length, and due to the clever design, there is no need to bend the ground connectors, like on some other systems. ShopLine DALI tracks are compatible with a wide range of ShopLine DALI luminaires from SG, for both spot lighting and general lighting.
