Fevik 1000/2000 + 1500/2500

Fevik is a modern LED luminaire with a slim profile and wide light dispersion, for wall mounting. During installation, the light output is selected from a choice of two levels using a dipswitch on the LED module. The luminaire is made of die-cast aluminium, powder-coated white or graphite, with an aluminium reflector and a tempered glass diffuser. Fevik can be mounted as an upward light or a downward light.With the adjustable wall/corner bracket and ArmMount (accessory), Fevik can be used in most lighting situations. The wall/corner bracket can be angled 180° for wall mounting, and 165° for corners. Using ArmMount, Fevik can be installed on horizontal tubes. Fits Ø42–48 mm tubes and provides an invisible transition between luminaire and wall bracket.
