

# Fagernes Bollard

A modern, classic bollard. A perfect match with Fagernes wall lamps. It gives a great, glare free light and is ideal for driveways, gardens and other outdoor environments. Fitted with an efficient integrated LED and is phasecut dimmable. Can be screwed directly on the surface or be cast in with an anchoring set (sold separately). It features an innovative adjustment mechanism, allowing the adjustment to be done from the top side. Fagernes bollard is also available in a version with outlet. Very handy for all things that need power in the garden. It also comes with a daylight and motion sensor (PIR). After dark it switches on when it detects movement, and stays on for the pre-set time. A good way of saving power and preventing light pollution. It can also control the light of other luminaires (slaves). A shield plate is available as accessory, which can be clicked on to block off the light in one or more directions as desired.
