# Sense Pro Connect 600x600

Sense Pro Connect is an energy-efficient LED panel with a slim frame for a clean, modern look. It features an integrated SG Connect sensor for smart, energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, delivering significant energy savings. A built-in daylight sensor can be activated to maintain the desired light level at all times. Configuration is simple via the SG Connect Commissioning App, and the panel can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Sense Pro Connect is a high-quality, all-round panel suitable for all kinds of environments. It can be installed in ceilings with exposed T-grids without accessories, and in ceilings with concealed T-grids using appropriate accessories.
