#### **EcoLine Connect**

Ecoline Connect is a slim and elegant ceiling luminaire for offices, schools, and public buildings, featuring an integrated SG Connect sensor for smart and energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, delivering significant energy savings. A built-in daylight sensor can be activated to maintain the desired light level at all times. Configuration is simple via the SG Connect Commissioning App, and the luminaire can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Ecoline Connect features a 3-layer optical system with low glare (UGR < 19) and a robust housing in powder-coated steel. It can be mounted directly on the ceiling or suspended using the adjustable wire kit (sold separately).
