

Connect Bridge Kit

The SG Connect Bridge Kit acts as a link between the SG Connect system and conventional DALI luminaires. The kit contains what is necessary for standard DALI luminaires to communicate and take advantage of all the same features as other luminaires in the SG Connect series. The Bridge Kit is easily added to the system using the SG Connect Commissioning App. • Built-in Bluetooth for programming and Zigbee for communication with other devices in the Connect series. • Up to 20 DALI devices. • Energy measurement when load is connected to internal relay. • 400VA maximum load on internal relay.
