

# Fenes Maxi

Fenes Maxi is a minimalistic LED luminaire that combines modern design with the latest in LED technology to deliver optimal performance and energy efficiency. It is an excellent choice for replacing old 125W HQL and 70W NAV fixtures, making it easy to upgrade to LED technology without the need to replace existing poles – a smart and cost-effective solution for outdoor areas such as parks, access roads, large parking lots, and other public spaces. The luminaire is designed for flexibility, featuring a multi-adapter that fits both poles Ø60mm and side arm Ø42/48mm, and can be adjusted in steps of 5°, ensuring the perfect light angle every time. Choose from various dimming and control techniques to tailor the lighting to different needs. Fenes Maxi is made of powder-coated, die-cast aluminum and tempered glass. It is delivered complete with an 8 meter cable for easy installation and is built to withstand ambient temperatures as low as -40°C
