# Sense Basic Connect

Sense Basic Connect is a cost-effective LED panel that's ideal for both new installations and refurbishment projects. It features an integrated SG Connect sensor for smart, energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, delivering significant energy savings. A built-in daylight sensor can be activated to maintain the desired light level at all times. Configuration is simple via the SG Connect Commissioning App, and the panel can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Sense Basic Connect comes in a lightweight steel housing with a slim 36 mm profile and a back-lit design for even, comfortable illumination. Supplied in single packs for easy handling.
