Rax Soft 220-240 Connect

Rax Soft 220-240 Connect is a flexible, high-performance downlight for public buildings, offices, corridors, and similar environments. It comes with an integrated SG Connect sensor for smart and energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, ensuring significant energy savings. It also features a built-in daylight sensor that can be activated to maintain the desired light level in its working area. Configuration is simple via the SG Connect Commissioning App, and the luminaire can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Rax Soft 220-240 Connect combines advanced optics with practical flexibility. It features optimized lens and reflector optics for excellent light control, and a satin matte reflector for maximum efficiency. The unique design allows installation in hole diameters from 220 to 240 mm and can be adapted to Ø200 mm holes with plate cut-out for the sensor box. The luminaire must be combined with a suitable driver kit according to the desired lumen output.
