

# Farsund Slim 300

Ultra-slim ceiling light for indoor lighting, suitable for both ceiling and wall mounting. The fixture is made of durable polycarbonate, and with its opal-prismatic diffuser, it provides a pleasant, uniform, and efficient light with a long lifespan. It is dimmable with phase-cut dimmers, and we recommend LEDDim 400 and LEDDim Smart. Effortless installation with two cable entries, a backplate that fits all standard ceiling boxes, and a quick-connector to the front panel which is easily assembled with practical magnets. Visible cabling is also possible.
