

# Prelude Square Connect

Prelude Square Connect is a mirror luminaire with a sharp, modern design, featuring an integrated SG Connect sensor for smart and energy-efficient lighting control. The sensor switches the light on when motion is detected and off after a defined time period, delivering significant energy savings. A built-in daylight sensor can be activated to maintain the desired light level at all times. Configuration is simple via the SG Connect Commissioning App, and the luminaire can be used as a standalone unit or as part of a larger system that can easily be expanded or reconfigured as needed. Prelude Square Connect provides highly uniform light thanks to a specially developed LED lens technology, making it an ideal choice above mirrors in bathrooms and similar environments.
