

LEDDim 200

LEDDim 200 is a 2-pole dimmer with a rotary/push button for on/off and a correspondence terminal. It can dim all types of light sources that use trailing edge dimming. You can set a minimum level that is remembered even if the phase is interrupted. The dimming range goes from 2-100% with loads of 3-200 VA, the design matches the SG Install design line with the beautiful beveled edge and is mounted in a 1M box and frame from SG Install. LEDDim 200 is 100% compatible with other cans and frames on the market. The front and knob are made of the highest quality plastic with a surface that is 100% UV-resistant and antibacterial.
